The doctors and staff at Lunsford Veterinary Care Center are committed to providing our patients with the safest and most advanced healthcare that we can offer. All anesthesia and surgery involve some potential risks and complications for your pet. They will receive a preanesthetic risk assessment to check their vitals and rule out any obvious external physical reasons that would lead to any unnecessary risks from anesthesia and/or surgery at this time. There are limits, however, to the information that outward physical symptoms can warn us about. For this reason, we will perform Pre Surgical Bloodwork, allowing a more thorough evaluation of your pet's health and can pick up problems that might otherwise have been missed like anemia, diabetes, or early kidney disease. We will also place an I.V. catheter and administer I.V. fluids in many cases to further safeguard your pet.

All pets being spayed or neutered will be tattooed, unless otherwise indicated.

Additional Optional Services

- Nail Trim \$16.50 +Tax
- Ear Cleaning \$18.00

Microchipping

We offer permanent identification for your pet through HomeAgain microchipping. This tiny microchip can be placed under the skin between the shoulder blades while your pet is asleep.

- Yes, I would like a HomeAgain Microchip placed for my pet. I understand there will be an additional fee of \$35 for microchip placement and \$21.99 for the initial membership and registration.
- No, I do not authorize my pet to be microchipped today.

We are happy to provide you with more information about microchipping! This is a service that does not require anesthesia, should you choose to do this in the future.
